Application No.: 09/770,473

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application:

1. (Currently Amended) A process for treatment of at least one condition chosen from seborrhoea of the skin and scalp, disorders associated with seborrhoea, and disorders associated with microorganisms of the genus *Propionibacterium*, said process comprising:

applying to an area in need of said treatment at least one compound chosen from polyamino acid derivatives of formula (I) and salts thereof,

$$R_{1} = X = \begin{bmatrix} C & CH & N & \\ & & & \\ & & & \\ O & R_{2} & R_{3} \end{bmatrix}_{n}$$
 (I)

in which:

X is chosen from O, S, NH and NR" wherein R" is chosen from saturated and unsaturated, linear and branched C_{1-6} hydrocarbon-based radicals;

R₁ is chosen from:

- (i) hydrogen;
- (ii) linear and branched, saturated and unsaturated C₁₋₄₀ hydrocarbon-based radicals,
 - (iii) radicals of the formula

FINNEGAN HENDERSON FARABOW GARRETT & DUNNER LLP

Attorney Docket No. 05725.0834-00

wherein s is a number chosen from 0, 1, 2, 3 and 4; and R_4 is chosen from hydrogen and radicals chosen from -NH₂, -OH, -SH, -CHOHCH₃, -CONH₂, -NH-C(NH₂)=NH, -C₆H₅, -C₆H₄OH and

and;

(iv) radicals of the formula

wherein m is a number chosen from 3, 4 and 5;

 R_2 is chosen from hydrogen; saturated and unsaturated, linear and branched C_{1-8} hydrocarbon-based radicals; and radicals chosen from $-CH_2C_6H_5$, $-CH_2C_6H_4OH$, $-CH_2OH$, $-CHOHCH_3$, $-(CH_2)_t-NH_2$, wherein t is a number chosen from 3, 4 and 5;

 R_3 is chosen from hydrogen and saturated and unsaturated, linear and branched C_{1-6} hydrocarbon-based radicals; and

FINNEGAN HENDERSON FARABOW GARRETT & DUNNER LLP

Application No.: 09/770,473

n is a number greater than 1 chosen such that the number average molecular weight of the polyamino acid derivative ranges from 150 to 200 000;

wherein the repeating unit may be identical or different for the same derivative [[.]], and wherein the polyamino acid derivative of formula (I) and salts thereof are the only anti-seborrhoeic agents applied to the area in need of treatment.

- 2. (Original) A process according to claim 1, wherein said microorganisms are *Propionibacterium acnes*.
- 3. (Original) A process according to claim 1, wherein said microorganisms are *Propionibacterium granulosum*.
- 4. (Original) A process according to claim 1, wherein R₁ is chosen from linear and branched, saturated and unsaturated C₁₋₄₀ hydrocarbon-based radicals substituted with at least one hydroxyl radical, at least one radical -NRR', or at least one hydroxyl radical and at least one radical -NRR', wherein R and R', which may be identical or different, are chosen from hydrogen and saturated and unsaturated, linear and branched C₁₋₆ hydrocarbon-based radicals.
- 5. (Original) A process according to claim 1, wherein R_1 is chosen from linear and branched, saturated and unsaturated C_{1-40} hydrocarbon-based radicals interrupted with at least one hetero atom chosen from N, O and Si.

FINNEGAN HENDERSON FARABOW GARRETT & DUNNER LLP

Application No.: 09/770,473

6. (Original) A process according to claim 1, wherein said at least one

compound is administered in the form of a cosmetic composition.

7. (Original) A process according to claim 6, wherein the treatment

comprises the cosmetic treatment of at least one disorder chosen from seborrhoeic

dermatitis, acne, greasy skin with a tendency towards acne, and hyperseborrhoea.

8. (Original) A process according to claim 1, wherein said at least one

compound is administered in the form of a pharmaceutical composition.

9. (Original) A process according to claim 8, in which the pharmaceutical

composition is administered for treating at least one disorder chosen from seborrhoeic

dermatitis, acne, greasy skin with a tendency towards acne and hyperseborrhoea.

10. (Original) A process according to claim 1, wherein in said polyamino acid

derivatives of formula (I) and salts thereof, at least one of the following definitions apply:

X is chosen from O, S, NH and NR", wherein R" is chosen from saturated and

unsaturated, linear and branched C₁₋₆ hydrocarbon-based radicals;

R₁ is chosen from linear and branched, saturated and unsaturated C₈₋₄₀

hydrocarbon-based radicals,

R₂ is hydrogen;

R₃ is chosen from saturated, linear and branched C₁₋₆ hydrocarbon-based

radicals; and

HENDERSON FARABOW GARRETT & DUNNERLLP

FINNEGAN

n is chosen from a number ranging from 2 to 100 and a number chosen such that the number average molecular weight of said polyamino acid derivative ranges from 150 to 10,000.

- 11. (Original) A process according to claim 10, wherein R_3 is chosen from methyl and ethyl radicals.
- 12. (Original) A process according to claim 10, wherein R_1 is chosen from linear and branched, saturated and unsaturated C_{8-40} hydrocarbon-based radicals substituted with at least one hydroxyl radical, at least one radical -NRR', or at least one hydroxyl radical and at least one radical -NRR', wherein R and R', which may be identical or different, are chosen from hydrogen and saturated and unsaturated, linear and branched C_{1-6} hydrocarbon-based radicals.
- 13. (Original) A process according to claim 10, wherein R_1 is chosen from linear and branched, saturated and unsaturated C_{8-40} hydrocarbon-based radicals interrupted with at least one hetero atom chosen from N, O and Si.
- 14. (Original) A process according to claim 13, wherein n is chosen from a number ranging from 2 to 100.
- 15. (Original) A process according to claim 14, wherein n is a number chosen such that the number average molecular weight of said polyamino acid derivative ranges from 150 to 10,000.

FINNEGAN HENDERSON FARABOW GARRETT & DUNNER LLP

16. (Original) A process according to claim 10, wherein:

X is chosen from O, S, NH and NR", wherein R" is chosen from saturated and unsaturated, linear and branched C₁₋₆ hydrocarbon-based radicals;

 R_1 is chosen from linear and branched, saturated and unsaturated C_{8-40} hydrocarbon-based radicals,

R₂ is hydrogen;

 R_3 is chosen from saturated, linear and branched C_{1-6} hydrocarbon-based radicals; and

n is chosen from a number ranging from 2 to 100 and a number chosen such that the number average molecular weight of said polyamino acid derivative ranges from 150 to 10,000.

17. (Original) A process according to claim 1, wherein in said polyamino acid derivatives of formula (I) and salts thereof, at least one of the following definitions apply:

X is chosen from O, S and NH;

R₁ is chosen from linear and branched, saturated C₁₀₋₂₄ hydrocarbon-based radicals; and linear and branched unsaturated hydrocarbon-based radicals;

R₂ is hydrogen;

R₃ is a methyl radical; and

n is chosen from a number ranging from 4 to 50 and a number chosen such that the number average molecular weight of said polyamino acid derivative ranges from 300 to 8,000.

FINNEGAN HENDERSON FARABOW GARRETT & DUNNER LLP

18. (Original) A process according to claim 17, wherein n is chosen from a

number ranging from 4 to 50.

19. (Original) A process according to claim 17, wherein n is a number chosen

such that the number average molecular weight of said polyamino acid derivative

ranges from 300 to 8,000.

20. (Original) A process according to claim 17, wherein X is NH.

21. (Original) A process according to claim 17, wherein R₁ is chosen from

linear and branched, saturated C₁₀₋₂₄ hydrocarbon-based radicals substituted with at

least one hydroxyl radical.

22. (Original) A process according to claim 21, wherein said linear and

branched, saturated C₁₀₋₂₄ hydrocarbon-based radicals are substituted with 1, 2, 3, or 4

hydroxyl radicals.

23. (Original) A process according to claim 17, wherein R₁ is chosen from

linear and branched unsaturated hydrocarbon-based radicals substituted with at least

one hydroxyl radical.

24. (Original) A process according to claim 1, wherein:

X is chosen from O, S and NH;

FINNEGAN HENDERSON FARABOW GARRETT & DUNNERLL

R₁ is chosen from linear and branched, saturated C₁₀₋₂₄ hydrocarbon-based

radicals; and linear and branched unsaturated hydrocarbon-based radicals;

R₂ is hydrogen;

R₃ is a methyl radical; and

n is chosen from a number ranging from 4 to 50 and a number chosen such that

the number average molecular weight of said polyamino acid derivative ranges from

300 to 8,000.

25. (Currently amended) A process according to claim 1, wherein said at

least one compound is present in [[said]] a composition in an amount ranging from

0.001% to 30% by weight, relative to the total weight of the composition.

26. (Original) A process according to claim 25, wherein said at least one

compound is present in said composition in an amount ranging from 0.01% to 15% by

weight, relative to the total weight of the composition.

27. (Original) A process according to claim 26, wherein said at least one

compound is present in said composition in an amount ranging from 0.5% to 5% by

weight, relative to the total weight of the composition.

28. (Original) A process according to claim 10, wherein said at least one

compound is applied in the form of a composition chosen from a cosmetic composition

and a pharmaceutical composition.

HENDERSON FARABOW GARRETT & DUNNER LLP
